BOILING HUMAN REMAINS.

Horrible Discovery Made by the San Francisco Police Yesterday.

San Francisco, September 15.-A horrible discovery was made in Chinatown to-day. Information was given the City Coroner that a cellar on Pacific street. He went there, Anglo-Turkish joint occupation of Egypt forced his way in, and found the floor coyforced-his way in, and found the floor covered with human skulls and bones partially covered with flesh in the last stage of green putrification. Among the decaying mass worms were crawling, while the floor was wet and slimy with the liquid exuding from the remsins. In an inner room the Coroner found a number of Chinese engaged in boiling down the remains of other bodies, while other Chinese were engaged in scraping the boiled bones and packing them in boxes for shipment to China. It is estimated the cel-

Which had been taken secretly from the various cemetries throughout the State. As an instance of Chinese ingenuity, it is stated that those in charge of the operations, fear-ing the stench from the boiling pots would be so great as to attract attention outside, procured two living skunks, that the odor of the latter might overcome the former. The Coroner confiscated all the remains.

The discovery has created a deep and in-tense excitement. The knowledge that such

A MASS OF PUTRIPACTION

Was lying exposed in the very hoart of the city, while at the same time the drainage and sewers of the city are known to be in an unwholesome, filthy state, created a feeling of fear for the health of the city. After all the boxes containing the remains of the dead Chinamen had been removed to the morgue, the City Uoroner was interviewed in regard to the matter. He stated that when he arrived in the cellar in which the boxes were stored, and the patrified remains which had still to be boiled were lying around, he set to work with a latchet to break open the boxes. There were some sixty bodies in all. Each of them contained one tin case in Each of them contained one tin case in which were carefully rolled up in oiled cloths a number of human bones. The smaller bones and long strips of skin were wrapped in separate parcels and placed within the larger one. On the outside of the box was a label in Chinese characters indicating the name of the person while living, so that the remains could be claimed by the relatives on their arrival in China. After having oresped savarul cases the covener concluded opened several cases the coroner conclud to seize the whole lot and remove them to the morgue. Express wagons were called, and while the cases were being placed in the wagons some of the boxes rolled off to the pavement, breaking them and leaving the

bones exposed to view.

The crowd which had assembled, having learned the cause of the excitement, jumped on the bones, and in their indignation trod them under foot. The police officers quickly interfered, and the loading continued with-out further interruption, and the remains

Most of the boxes containing the remains were on examination found to have come from cities in the interior of the State. The remains were shipped from there to San Francisco in common tea boxes. Those that come from the interior are boiled and prepared before shipment, so that no odor is perceptible en route. Only those removed from San Francisco cemeteries have the flesh still on them when brought to the preparation cellar. It was the intention to have shipped all these on the steamer "City of Peking," which sails on Saturday next. It is rumored that the Chinese Six Companies will bring an action against the Coroner for the removal of the boxes and remains.
